

AGRI-CARE

- *Waste Collection Areas
- *Animal Containment Areas
- *Manure Applications
- *Marine Applications

The
Natural
Way

Description

AGRI-CARE is an advancement in odor control technology. **AGRI-CARE** provides deep and effective cleaning, unique to microbial activity. In addition, the fast acting proprietary natural ingredients neutralize odor-causing chemicals, such as amines, ammonia, mercaptans, and hydrogen sulfide. After neutralization, these compounds are subsequently biodegraded by the selectively adapted strains incorporated in **AGRI-CARE**.

AGRI-CARE is effective against a variety of nitrogen- and-sulfur-containing compounds, classically associated with waste-odor problems including, amines, ammonia, mercaptans, and hydrogen sulfide. The accelerated biodegradation of odorous organic compounds is enhanced by the selectively adapted strains found in **AGRI-CARE**, and is assisted by specially formulated microbial growth stimulating ingredients. **AGRI-CARE** eradicates odors by attacking and degrading the organic source of the odor.

Benefits

- ◆ **AGRI-CARE** rapidly neutralizes and eliminates odors without relying on the use of masking agents or hazardous chemical oxidizers.
- ◆ Selectively adapted bacteria reduce or eliminate odor by degrading volatile amines and mercaptans at accelerated rates.
- ◆ A proprietary stimulant enhances the activity of Brighton Industries, Inc. bacteria, as well as indigenous strains, resulting in higher rates of degradation.
- ◆ Rapid and long-term effect.

Features

- ◆ Fast-Acting Neutralizer for Immediate Odor Relief
- ◆ Selectively-Adapted Bacteria for Degradation of Malodorous Organic Compounds
- ◆ Proprietary Ingredients which Stimulate Microbial Activity
